Meridian SeamGas reserves expansion exploration drilling update

Key Points

- The MER11VR coal seam gas (CSG) appraisal well - the eighth in the Meridian SeamGas reserves expansion exploration program – spudded on 6 March 2011
- Wells drilled to date in the program have intersected from 15 metres to in excess of 20 metres of net coal measured, generally exceeding expectations.

As Operator of the Meridian SeamGas CSG gas fields, WestSide Corporation Ltd (ASX Code: WCL) is pleased to advise that drilling has commenced on the MER11VR appraisal well in PL 94 near Moura – maintaining the current reserve expansion program's momentum.

MER11VR, which replaces the previously plugged and abandoned MER11V appraisal well nearby, spudded at 20:30 hours on 6 March 2011 and is drilling ahead.

The larger Schramm TXD 180 rig will drill and case this appraisal well to an approximate depth of 1,300 meters targeting the Baralaba Coal Measures. The well will then be logged and tested for casing and suspension as a future production well.

This is the eighth well in an exploration program designed to increase the Meridian SeamGas joint venture's gross proved and probable (2P) reserves by up to 200 petajoules. (See attached map.)

Wells drilled to date in the reserves expansion exploration program have intersected from 15 metres to in excess of 20 metres of net coal measured, generally exceeding expectations.

WestSide will issue regular updates as and when appropriate as the reserves expansion exploration program progresses.

About WestSide Corporation Ltd

WestSide Corporation Limited is an ASX-listed company (ASX code: WCL) with interests in coal seam gas (CSG) projects in Queensland and Indonesia.

WestSide operates the Meridian SeamGas CSG fields west of Gladstone in Queensland's Bowen Basin. The Meridian fields comprise a range of CSG assets including a petroleum lease, gas rights in mining leases and gas compression and pipeline infrastructure connected to Queensland's commercial gas network.

WestSide holds a 51% interest in the fields with Mitsui E&P Australia Pty Ltd holding the remaining 49%. Elsewhere in the Bowen Basin, WestSide is currently operating an exploration and appraisal program at the ATP 769P (Paranui) and ATP 688P (Tilbrook and Mount Saint Martin) sites. WestSide holds a 50% interest in each area with QGC holding the other 50% in each case.

WestSide also has a position in the Galilee Basin (Queensland) with two tenements (ATP 974P and ATP 978P) covering an area of over 14,000 sq kms. The Company expects to commence exploration activities in these tenements later this financial year, and is also assessing the CSG potential of certain coal deposits in Indonesia through its relationship with PT Bumi Resources TBK, one of Indonesia's largest coal miners.
