

Announcement to the ASX

iSOFT agrees on a \$2 million deal with ACT Health

Sydney – Tuesday, 31 March 2010 – iSOFT Group Limited (ASX: ISF), Australia's largest listed health information technology company, today announced a contract worth more than \$2 million with ACT Health in Australia for new patient and emergency software applications at Calvary Public Hospital.

The agreement is for the installation of iSOFT Patient Management and iSOFT Emergency at the 280-bed Calvary Hospital this year. About \$900,000 of the total consists of license fees. The agreement also has an additional component for support and maintenance.

The deal follows the roll out of similar solutions at Canberra Hospital and across community health initiatives in the Australian Capital Territory (ACT), and meets ACT Health's goal of providing integrated patient care across all services. Emergency department specialists, who routinely work at both the Calvary and Canberra hospitals, will benefit from a common system.

"iSOFT's ten-year association with ACT Health is a huge testament to the quality of our applications and service and the dedication of our people," said Denis Tebbutt, Managing Director of iSOFT Australia and New Zealand.

Owen Smalley, ACT Health's Chief Information Officer, said iSOFT's solutions are the foundation for fully integrated healthcare services and are fundamental for actively improving efficiency and the quality of care services. "Giving doctors and clinical staff instant access to accurate patient information anywhere across our acute and community settings will help improve patient care significantly," Smalley said.

About iSOFT Group

iSOFT Group Limited (ASX: ISF) is the largest health information technology company listed on the Australian Securities Exchange, and among the world's biggest providers of advanced application solutions in modern healthcare economies.

iSOFT works with healthcare professionals to design and build software applications that answer all of the difficult questions posed by today's healthcare delivery challenges. Our solutions act as a catalyst for change, supporting free exchange of critical information across diverse care settings and participating organisations.

Today, more than 13,000 provider organisations in about 40 countries use iSOFT's solutions to manage patient information and drive improvements in their core processes. The group's sustainable development is delivered through careful planning, in-depth analysis of the market, and anticipation of our clients' evolving requirements. Our business is driven by the collective talent, experience and commitment of more than 4,700 specialists, including more than 2,700 technology and development professionals.

A global network of iSOFT subsidiaries, supported by an extensive partner network, provides substantial experience of national healthcare markets. As a result, we offer our clients comprehensive knowledge of local market requirements in terms of culture, language, working practices, regulation and organizational structure.
