

2nd China International Medical Device Summit 2011 Is Coming

13-14 January, 2011

Kuntai Royal Hotel, Beijing, China

Organized by Duxes Business Consulting Inc. and endorsed by powerful organizations around the world, 2nd China International Medical Device Summit 2011 will take place on 13-14 January, 2011 in Beijing, China.

In 2010, global medical device companies are suffering more difficulties due to cost concerns. However, China, where the medtech product industry is of unpredictable potential, has grown with an annual rate of 15-18% in the medical device market during the past few years. It is expected to be the second largest market in 2020. China is highlighted especially for 850 million yuan in 2009 committed by Chinese government to modernizing the infrastructure of health care and providing insurance coverage for hundreds of millions of people.

With the last annual event being a great success that gathered high-profile delegates from 64 businesses, the 2nd China International Medical Device Summit 2011 is to be held with the strong recommendation of previous participants and speakers.

The summit will provide an effective platform for the participants to better understand Chinese medical device policies and market, to improve the sales and channel management of medical device and to explore potential investment opportunities. Speakers from Chinese central government like SFDA and SAIC and hospitals as well as world-leading companies including GE, BD and Siemens will share with the attendees their precious experience and opinions on China's medical device industry development.
