ASX RELEASE/ MEDIA RELEASE

Mining Lease Application for Springsure Creek Project

Bandanna Energy Limited (Bandanna – ASX code “BND”), through its wholly owned subsidiary Springsure Creek Coal Pty Ltd, is pleased to announce that it has formally applied for a Mining Lease on EPC 891, its Springsure Creek tenement.

The Mining Lease Application (MLA 70461) covers the central portion of the EPC (See attached Figures).

The Springsure Creek mine is proposed as a totally underground longwall and conventional mining extraction process. Springsure Creek Coal is currently developing mining plans and surface management techniques. Further details will be released as the Environmental Impact Assessment and MLA processes move forward.

As outlined in an ASX release earlier this week, Bandanna remains committed to ensuring future mining impacts on agricultural lands are minimised, and that future development of Springsure Creek captures the spirit of proposed Strategic Cropping Lands legislation that is expected to address issues relating to the co-existence of mining and agricultural activities.
