The agreement allows for Byte Power Singapore to sell and implement Big Data related solutions originated from Wimobilize and its associates, exclusively in Singapore and Malaysia.

Big Data is the mix of unstructured and multi-structured data that arrives from multiple sources at an alarming velocity, volume and variety that traditional analytical software will not be able to provide real time and predictive analysis. Big Data is a growing industry with the International Data Corporation (IDC) predicting that revenue from the sales of Big Data and business analytics applications, tools, and services will increase more than 50%, from nearly \$122 billion in 2015 to more than \$187 billion in 2019.

The new partnership with Wimobilize will not only further enhance the group's Asia presence in the market, but will also allow an optimal opportunity for the group to revive its IT&T segment.
