WiseTech Global acquires warehouse management solutions provider, Microlistics

WiseTech Global today announced the acquisition of Microlistics, a leading provider of warehouse management solutions encompassing enterprise, express, cold storage and third party logistics.

Microlistics provides its warehouse management solutions to customers across Asia-Pacific, North America and the Middle East, including Linfox, Mitre 10, ESAB, Thomas Foods International, Berli Jucker Logistics, Spotlight Retail Group, Brand Collective, Concept Logistics, Nick Scali, Russell Corporation, TT Logistics, TNT Express Logistics, and many other leading supply chain organisations.

WiseTech Global CEO, Richard White, said "With the impact of ecommerce and advances in automation, warehouse management is an increasingly complex and specialised part of the international supply chain. The combined strength of WiseTech's global innovation capabilities and our CargoWise One supply chain execution platform integrated with Microlistics' powerful warehouse solutions for enterprise, express, third party logistics and cold storage will provide significant benefit to logistics providers."

"WiseTech is uniquely well-placed to deliver the technology convergence and deep integration necessary to facilitate omni-channel, multi-modal movements across the supply chain — of which warehousing is a critical component. Ultimately the native embedding of Microlistics leading WMS solutions into our integrated CargoWise One platform operating across 125 countries will substantially increase productivity for local and global logistics providers and their customers."

Microlistics' leading-edge software development, its deep domain knowledge of warehousing, rapid deployment, data analytics and reporting capabilities significantly improves customers' warehouse and business operations. In 2017, Gartner recognised Microlistics WMS in its selection of leading systems worldwide.

Microlistics Founder and Managing Director, Mark Dawson, said "Joining the WiseTech Global group, is a key part of our evolution. With the global strength and powerful innovation capability of WiseTech, and our WMS expertise, together we will accelerate development of high productivity WMS to bring significant new benefits to the logistics industry. Microlistics will remain focused on warehouse management solutions and we can leverage WiseTech's global reach, resources and the CargoWise One platform, which for our customers will mean the opportunity for end-to-end execution, control and visibility of the supply chain."

Remaining under the leadership of Mark Dawson, Microlistics will continue to develop and deliver its warehouse management solutions directly to its worldwide customers, and potentially to the 7,000 logistics providers across 125 countries who utilise WiseTech's integrated supply chain execution solutions.

Along with our recent acquisitions in Brazil, Germany, Italy, Taiwan, North America and the Netherlands, the addition of Microlistics to the WiseTech Global group is in line with our stated strategy of accelerating long-term organic growth through targeted, valuable acquisitions across new geographies and larger, globally capable agencies.

WiseTech's global integrated platform, CargoWise One, enables logistics service providers to execute highly complex transactions in areas such as freight forwarding, customs clearance, warehousing, shipping, land transport and cross-border compliance and to manage their operations on one database across multiple users, functions, countries, languages and currencies.
