# Old Pirate – An Exceptional Ore Potential!

- Old Pirate has **COARSE GOLD** effect.
- In essence <20% of the quartz contains >90% of the gold.
- **Our Innovation** to solve this is detailed and systematic surface sampling along the strike of the veins.
  - Exposing and **continuous** sampling of all surface veins.
  - Detailed **measurements of width** and location.
  - Akin to **Grade Control** of the first bench.
  - Explains the “**hit and miss**” nature of the drilling.
- Recent work shows **up to 97.3% recovery via gravity methods**:
  - **No need for cyanide leach** with environmental, energy and capital savings.
  - Simple and scalable development **with a risk-managed approach**.

Table (right) shows all samples in mineralised veins up to 2012. The datasets are statistically comparable.

# Old Pirate – Stage 1 Scoping Study Pending Update

*Scoping Study highlights Old Pirate's robust economics and its significant free cash flow generation potential. Pending update which is targeting new resource estimation, increased recovery, pit and underground design and staged approach.*

- Independent Scoping Study by Entech Pty Ltd Mining Consultants in May 2012.
- Based **only on open pit** Indicated and Inferred Resource to a depth of 100m.
- **Significant expansion potential** at depth, along strike and in repeat veins identified by surface sampling and not currently factored in resource or scoping study.

## Scoping Study Summary \*

832,000 tonnes @ 11.5g/t Au extracted from open pit

261,000 ounces Au recovered over 2 years (85% grav recov)\*\*

Stand-alone gravity plant (no chemical processing)

\$27.1M capital expenditure\*\*\*

~2500 ounces per vertical metre

~A\$511 per ounce total costs

~A\$383 per ounce cash costs

**\$257M positive cash flow** after expenses, royalties and capex

\*Scoping study based on A\$1,600 per ounce Au price

\*\* Recent test-work reveals recoveries up to 97.3% Au which would add a further ~37,000 ounces to production

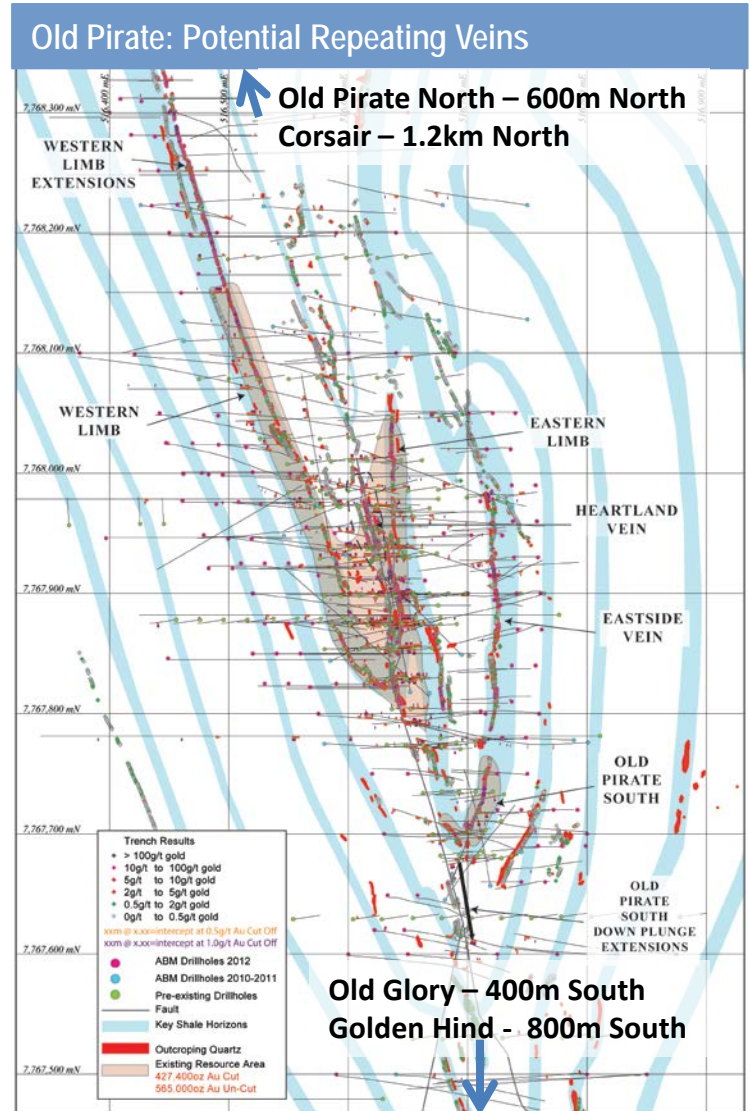

\*\*\* Due to recent results on recovery quality, ABM believes this can be considerably reduced via scalable development including trial mining. Refer Slide 16 for details.

  - 25m averaging 7.62g/t gold including:
    - 8m averaging 14.28g/t gold.

# Old Pirate – Bulk Sample / Trial Mining

- Aim – to trial mine / bulk sample **10,000 tonnes of material** to validate mining methods, dilution management, grade, processing and recovery.
- Provides all data for **feasibility** study.
- Dig up to **5 metres depth** on exposed quartz veins.
- Install a portable modular gravity gold plant:
  - **10 to 15tph** taking ~10 weeks to complete processing.
  - **Rent or purchase plant** with capital cost to be finalised (budgeting ~\$2M).
- Estimated cash operating cost for bulk sample of ~**\$150 per tonne** for mining and processing.
- **Targeting 10g/t recovered grade** with cash cost of ~\$440 per ounce producing ~3,200 ounces.
- Gold will be held in secured storage / in trust until the mineral lease is granted.

*ABM is waiting on permits which will be followed by further pilot plant cost assessment and design. Plant will be for gravity concentrate only and will likely include crushing / grind, concentrator and gold room. All numbers presented on this slide are guide-lines only. The start date for the bulk sample / trial mining is dependent on permits, wet-season and equipment delivery times. The aim is to start the processing in 3 to 6 months.*

*The bulk sample / trial mining is intended to be carried out under an Exploration License. It is intended to apply for a full scale mineral lease in the near future.*

# Old Pirate – Staged Development

**Strategic Aim** – to use a staged risked managed development path.

- Pilot plant 10-15tph, however back-end concentrating plant scoped to 30 to 40tph (200K tpa).
- Following pilot plant study and granting of mining lease upgrade front-end to match back-end to 200K tpa at low cost.

Why is Old Pirate one of the best gold development plays in the Asia Pacific region?

- **Open Pit High-Grade** (first shovels pay).
- **Low capex and low cash costs** projected. Forecast as one of the lowest cost / highest margin Australian producers.
- Safe jurisdiction with **low sovereign risk**.
- Coming on stream in what is forecast to be the **best gold bull market ever**.

# Buccaneer Gold Porphyry

- The first intrusive related gold deposit discovered in the Tanami-Arunta Region.
- Located **only 2km** from Old Pirate.
- Has the scale potential to suggest **low-strip ratio / bulk tonnage** mining operation.
- Targeting initial Scoping Study in late 2012 / 2013.
