

ASX Announcement  
ASX: ARS

20<sup>th</sup> December 2016

## **First diamond hole completed on new targets at Windy Hill, Paupong Project, NSW**

### **Key Points:**

- **First diamond drillhole completed at Windy Hill ahead of schedule**
- **Second diamond hole commenced**
- **Core logging and sampling will be ongoing in January**
- **Assays expected in February 2017**
- **Drilling program supported by funding from the NSW Government Cooperative Drilling New Frontiers initiative**

Alt Resources Ltd (ASX: ARS; "Alt") is pleased to announce that the first diamond drillhole at Windy Hill has been completed to a depth of 401.5m. Windy Hill has been defined as a significant Intrusion-Related Gold (IRG) target through comprehensive geophysical, geochemical and geological investigation<sup>1</sup> and represents the highest ranked targets at the Company's flagship Paupong Gold-Base Metals project in the southern Lachlan Orogen, NSW. (Figure 1). 7 diamond holes have been planned across the prospective Windy Hill area, for a minimum of 2,000m.

The Windy Hill program is supported by the maximum drill funding of \$200,000 for Round 2 of the NSW Government's New Frontiers Co-operative Drilling Program. The grant will cover 75% of per metre drilling costs. The Paupong Project is the only project to receive the maximum amount of funding in both rounds of the NSW Cooperative Drilling program. Logging and sampling of the first hole, PDD015, are ongoing, with results expected by February, 2017.

## Windy Hill Project

Windy Hill lies within Alt Resources' Paupong Project in the southern Lachlan Fold Belt, NSW. Prior to GFM Exploration's initial activities in the area from 2012, little or no mineral exploration had occurred beyond first pass stream sediment sampling in the 1970s. This historical sampling did not include gold analyses. Alt flew a 5,000line km aerial magnetic survey over the Paupong Project in January 2016, identifying possible buried intrusions, particularly beneath Windy Hill. These modelled intrusions have coincident soil geochemical anomalies (arsenic, lead and copper; pathfinder elements for IRG systems) and IP anomalies<sup>1</sup>.

The Windy Hill anomalies are new targets that have not previously been drilled. As part of the New Frontiers funding award, Alt plans to test the geochemical, IP and deeper magnetic targets at Windy Hill.

Figure 1. Location of the Paupong Project, showing Windy Hill and the distribution of other prospects within the licence area. The geology shown is based on the 1:250,000 Bega-Mallacoota map sheet.

**Competent Persons Statement**

The information in this report that relates to mineral exploration and exploration potential is based on work compiled under the supervision of Dr Helen Degeling, a Competent Person and member of the AusIMM. Dr Degeling is an employee of Alt Resources and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity that she is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Degeling consents to the inclusion in this report of the information in the form and context in which it appears.

**No Representation, Warranty or Liability**

Whilst it is provided in good faith, no representation or warranty is made by Alt or any of its advisers, agents or employees as to the accuracy, completeness, currency or reasonableness of the information in this announcement or provided in connection with it, including the accuracy or attainability of any Forward Looking Statements set out in this announcement. Alt does not accept any responsibility to inform you of any matter arising or coming to Alts' notice after the date of this announcement which may affect any matter referred to in this announcement. Any liability of Alt, its advisers, agents and employees to you or to any other person or entity arising out of this announcement including pursuant to common law, the Corporations Act 2001 and the Trade Practices Act 1974 or any other applicable law is, to the maximum extent permitted by law, expressly disclaimed and excluded.
