PROGRESS REPORT - 3D SEISMIC PROGRAMME

Central Petroleum Limited ("Central") advises that its Surprise 3D seismic programme has now received the necessary government regulatory and environmental approvals. The programme of approximately 82 sq kms is located over the Surprise structure in EP115 in the Northern Territory.

The ground preparation work is expected to begin early next week. The seismic crew and equipment are being mobilised into the location using the all weather short cut road into the area which Central built for its exploration and appraisal operations.

The start of data recording will likely be close to the beginning of July 2012.
