ASX RELEASE

Order for DroneGuns™ for Major Asian Governmental Agency

- DroneGun Tactical™ units purchased for use by a high profile Asian government agency.
- DroneShield beat the limited competition on a combination of effectiveness, product-readiness and affordability.
- First DroneGun Tactical™ sale in Asia.

DroneShield Ltd (ASX:DRO) ("DroneShield" or the "Company") is pleased to announce that its distributor GT&E has purchased two units of its DroneGun Tactical™ product, for use by a national security agency of a major Asian country allied with the United States, to be deployed by the agency for drone threat mitigation.

Image: DroneGun Tactical™

It is understood that the end-user undertook an extensive review process benchmarking DroneShield's product against the limited range of competing solutions and, in the end, selected DroneShield's product based on a combination of its effectiveness, product readiness and affordability.

This is the first order for DroneGun Tactical™ in Asia. DroneShield has delivered the units.

Oleg Vornik, DroneShield's CEO, commented "While the revenue from this order to the overall DroneShield business is immaterial, we believe that this order is important in that it validates our global business model. DroneShield has built up a significant counterdrone track record in the region, including through a deployment of its counter-drone products at the 2018 Olympic Games earlier this year, and we look forward to continuing to build on this momentum."
