ASX RELEASE

Release of DroneNode™

- DroneShield releases DroneNode™, a portable, compact and inconspicuous counterdrone defence device.
- Enables low-profile protection of large outdoor events by law enforcement without raising public concern.

DroneShield Ltd (ASX:DRO) ("DroneShield" or the "Company") is pleased to announce a launch of the additional product DroneNode™, in response to end-user requirements¹.

DroneNode™ is an evolution of the Company's existing DroneCannon™ product, a portable, compact and inconspicuous counterdrone jamming device which can be utilised at large outdoor events by law enforcement without raising public concern. This product is particularly relevant given the recent drone attack on the Venezuelan president, and the high profile mailbomb terrorist attacks in the United States, heightening the awareness of law enforcement globally to potential threats to high profile political targets.

¹ DroneNode™ and DroneCannon™ have not been authorized as required by the federal communications commission ("FCC"). These devices are not, and may not be, offered for sale or lease, or sold or leased, in the United States, other than to the United States government and its agencies, until such authorization is obtained. The use of such devices in the United States by other persons or entities, including state or local government agencies, is prohibited by federal law. Laws limiting the availability of such devices to certain types of users may apply in other jurisdictions, and any sales will be conducted only in compliance with the applicable laws. Jammer affects only frequencies at 2.4Ghz, 5.8Ghz and GPS/Glonass (optionally). Emergency broadcasts, cellphone communication and other dedicated channels will not be affected.

The DroneNode™ product is contained in a portable case sized at approximately 50x50cm:

Oleg Vornik, DroneShield's CEO commented: "The release of DroneNode™ continues DroneShield's leadership in drone security for public events. DroneShield's recent credentials in the area include the 2018 Olympics, the 2018 Commonwealth Games, 2018 ASEAN-Australia Special Summit, the 2017 Hawaii IRONMAN World Championship, and the 2015 - 2017 Boston Marathons. The Company's products are well positioned to protect large public gatherings globally."
