### About Deep Yellow Limited

Deep Yellow Limited is a specialist, differentiated uranium exploration company implementing a contrarian strategy to grow shareholder wealth. This strategy is founded upon growing the existing uranium resources across the Company's uranium projects in Namibia and the pursuit of appropriate accretive, counter-cyclical acquisitions to build a global, geographically diverse project portfolio during a time of depressed uranium outlook. The Company's cornerstone suite of projects in Namibia are situated within a top-ranked African mining destination; in a country jurisdiction that has a long, well regarded history of safely and effectively developing, producing and regulating its considerable uranium mining industry.

Yours faithfully
