Carnarvon works begin – first sod turned in ceremony led by local MP

Perth-based clean power company Enerji Limited (ASX:ERJ) advises works have commenced to install Australia's first Opcon Powerbox with a sod-turning ceremony officiated at the Carnarvon site by Member for North West Mr Vincent Catania MLA.

This follows last week's WA Department of Environment and Conservation construction approval for the waste heat to power system including the Opcon Powerbox. Enerji's staff and contractors are on site to commence the civil works and construction.

Installation works will continue into March with commissioning scheduled to be completed by late March.

About Enerji

Enerji Limited is a Perth-based clean power company focussed on commercialising the Opcon Powerbox in Australia.

The Opcon Powerbox cogeneration technology transforms waste heat into electricity and therefore creates significant energy cost savings and reduced CO₂ emissions for its customers.

Enerji has exclusive sales and distribution rights for the Opcon Powerbox in Australia and options for Malaysia, Thailand, Singapore, and Sub-Saharan Africa.

The Opcon Powerbox, manufactured in Sweden by Opcon, represents a significant commercial opportunity through application to industrial, mining and power generation operations.

Enerji plans to maximise this opportunity and generate shareholder returns through long-term power purchase agreements.
