WA Minister for Energy inspects Enerji and Opcon Powerbox

Perth-based clean power company Enerji Limited (ASX:ERJ) briefed Western Australia Minister for Energy the Hon Peter Collier on its business and Australia's first Opcon Powerbox technology this week.

The briefing was conducted by Enerji's non-executive chairman Mr Ian Campbell and managing director Mr Greg Pennefather. It focused on the installation of the first Opcon Powerbox at the Carnarvon project and the potential for the application of waste heat to power systems in the state's mining industry.

The Minister then inspected the Opcon Powerbox at its storage point taking this opportunity just prior to the unit being transported to Carnarvon.

The visit comes after a sod-turning ceremony at the Carnarvon site by member for North West Mr Vincent Catania MLA earlier last week. The Opcon Powerbox will be transported to the site on Wednesday. On Thursday it will be installed on the concrete pad that has already been poured. Enerji's staff and contractors are on site to manage the civil works and construction.

Installation works will continue into March with commissioning scheduled to be completed by late March.

About Enerji

Enerji Limited is a Perth-based clean power company focussed on commercialising the Opcon Powerbox in Australia.

The Opcon Powerbox cogeneration technology transforms waste heat into electricity and therefore creates significant energy cost savings and reduced CO₂ emissions for its customers.

Enerji has exclusive sales and distribution rights for the Opcon Powerbox in Australia and options for Malaysia, Thailand, Singapore, and Sub-Saharan Africa.

The Opcon Powerbox, manufactured in Sweden by Opcon, represents a significant commercial opportunity through application to industrial, mining and power generation operations.

Enerji plans to maximise this opportunity and generate shareholder returns through long-term power purchase agreements.
