About Fluence Corporation Limited (ASX: FLC)

Global consultancy Frost and Sullivan recently awarded Fluence Corporation “2018 Global Decentralized Water and Wastewater Treatment Company of the Year”, noting in their award dissertation:

“Water is a fundamental part of life on earth; not only does it sustain people, but it also plays an essential role in sanitation, agriculture, and industrial processes. Without a sufficient water supply, communities suffer severe hardships including malnutrition, sickness, and even death. The swelling of the world's population is making water even scarcer and challenges communities to come up with quick and viable solutions to overcome the water scarcity problem.

While typical decentralized water treatment systems are relatively expensive, complicated, and inefficient, Fluence Corporation leverages innovative and smart technology solutions backed by decades of industrial know-how to excel in water and wastewater treatment solutions. Fluence's excellence becomes apparent through its success, as the company continues to expand its existing offerings as well as partnerships with other prominent companies in the industry. With its easy to use, sustainable, smart and cost-effective solutions as well as a remarkable year of growth, innovation, and leadership, Fluence Corporation earns Frost & Sullivan's 2018 Global Company of the Year Award in the decentralized water and wastewater treatment industry.”

Fluence has experience operating in over 70 countries worldwide and employs more than 300 highly trained water professionals around the globe. The Company provides local, sustainable treatment and reuse solutions, while empowering businesses and communities worldwide to make the most of their water resources.

Fluence offers an integrated range of services across the complete water cycle, from early stage evaluation, through design and delivery to ongoing support and optimization of water related assets. With established operations in North America, South America, the Middle East and Europe, Fluence is also expanding into China's rural wastewater treatment market.
