## ASX \& Media Release <br> Gulf of Thailand G2/48 drilling update

## Key Points:

- Anchan-1 drilling completed without incident
- Sainampueng-1 to commence immediately following Anchan-1

MELBOURNE, AUSTRALIA ( $23^{\text {rd }}$ November, 2012)
MEO Australia Limited (ASX: MEO; OTCQX: MEOAY) advises that Pearl Oil Offshore Limited (an affiliate of Mubadala Petroleum) has completed drilling of Anchan-1 in the Gulf of Thailand G2/48 Concession and is preparing to commence drilling Sainampueng-1.
Anchan-1 spudded at 23:00hrs (local time) on $15^{\text {th }}$ November and reached a Total Depth of 1678mMDRT* on $21^{\text {st }}$ November without encountering any significant hydrocarbons. The well is now being plugged back to the $133 / 8^{\prime \prime}$ casing shoe.

Anchan-1 fulfilled the Permit Year 5 obligation and was drilled by Pearl Oil at its sole expense.
Once Anchan-1 is plugged back, Sainampueng-1 will commence drilling from the existing $13{ }^{3} / 8^{\prime \prime}$ surface casing to test a $10-25 \mathrm{MMstb}$ (mean to P10 prospective resources) 3 way dip closure against the basin margin fault. The well will fulfil the Permit Year 6 obligation.
In the event Sainampueng-1 is successful, the basin is currently assessed to contain 23 prospects and leads in multiple play types with a cumulative un-risked mean potential exceeding 100 MMstb .

MEO's CEO and MD Jürgen Hendrich commented on the announcement:
"We are pleased Anchan-1 was drilled without incident and now keenly anticipate the commencement of Sainampueng-1 drilling."

Jürgen Hendrich
Managing Director \& Chief Executive Office
