

ASX Release

3 June 2015

Drilling commences at the Bygoo tin project

Thomson Resources is pleased to announce that drilling has commenced on its Bygoo tin project near Ardlethan, NSW. Ardlethan is the biggest tin deposit in NSW and is recorded to have produced 25,000 tonnes of tin in concentrate from open cut and underground operations between 1964 and 1986. Bygoo North has similar geology to Ardlethan and limited drilling has shown good potential for an economic tin deposit.

An initial program of 7 holes for around 800m is designed to confirm historic drill intersections and extend the mineralisation by testing along strike and at depth. Historic drilling in 1977 intersected 46m @ 0.6% tin and 33m at 0.3% tin (Table 1) on one section (Figure 2), but follow up in 2008 did not effectively test the northern and western continuations of the lode that is the focus of the current program.

Table 1 – best recorded intercepts at Bygoo North

Hole	From (m)	To (m)	Width (m)	Tin grade (% Sn)
P293	77.7	79.2	1.5	4.01
P307	32.0	36.5	4.5	0.59
P308	39.6	73.1	33.5	0.30
P313	30.5	45.7	15.2	0.52
P318	61.0	94.5	33.5	0.29
P319	76.2	102.1	25.9	0.60
P326	88.0	134.0	46.0	0.61
P380	153.0	171.0	18.0	0.50

All widths are down hole widths. This table is taken from Thomson's ASX release of 13th April which has all the relevant location and assay data.

The drilling at Bygoo is being undertaken by shareholder Australian Mineral & Waterwell Drilling Pty Ltd (Figure 3) who have agreed to accept part payment for drilling services in shares at an issue price of 1.8c/share.

Eoin Rothery
Chief Executive Officer

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Eoin Rothery, (MSc), who is a member of the Australian Institute of Geoscientists. Mr Rothery is a full time employee of Thomson Resources Ltd. Mr Rothery has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Rothery consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
