VOLT RESOURCES APPOINTS NEW YORK BASED EAS ADVISORS LLC AS NORTH AMERICAN ADVISOR

HIGHLIGHTS:

- **Volt Resources (VRC) appoints EAS Advisors LLC (“EAS”) as North American Corporate Advisor**
- **EAS and its founder, Mr Edward Sugar, have a successful history of backing selected ASX listed companies and assisting those companies with financial requirements to meet growth**
- **Volt Resources management will be working closely with EAS Advisors to promote the Company in the North American financial markets**
- **Volt Resources is looking to fast track the growth of the Company to early production following encouraging project results to date, in the natural graphite space**

Volt Resources Ltd (ASX: VRC) (“**Volt**” or the “**Company**”) is pleased to announce that it has appointed EAS Advisors LLC (“EAS”) as its North American corporate advisor. Located in New York, EAS is a boutique global advisory firm that was founded by Edward Sugar in 2008. The foundation of EAS’s business is built on an outstanding reputation of picking early stage mining and industrial groups, providing introductions to US based financial markets and access to institutional capital. Having participated in over US\$3.5 billion of transactions to date, EAS has an excellent track record in assisting ASX listed companies and providing financial support to these companies at key stages. EAS have been instrumental in a number of highly successful financing arrangements and have built an exceptional record for backing early finance deals for a number of ASX listed companies.

Commenting on their appointment, Mr Edward Sugar said:

“EAS is very excited to be working with Volt Resources as interest in the graphite space is continuing to build. We believe that Volt's Namangale project will be of strong interest to the US Investment community, particularly given the strong, local investor participation in Tanzania, the well-understood shallow ore body and the location of the resource in relation to required infrastructure. Volt is at an interesting stage having achieved a great deal to date with regard to the discovery and development of its large resource. We now look forward to working with Volt with its ongoing development and lifting their profile in North America”.

Commenting on EAS's appointment, Executive Chairman Stephen Hunt said:

"The Board of Volt Resources is delighted to be working closely with EAS, their track record of success in backing selected ASX listed mining companies is outstanding. The appointment of EAS could not come at better time as the company moves from exploration, through feasibility with the aim of achieving production."

Under the agreement with Volt, as part of its remuneration, EAS will be paid mainly in performance-based options and is strongly incentivised to assist in the growth of the Company. The Company has agreed to pay EAS performance based options which will be awarded as per below:

- The exercise price of 4,200,000 shall be A\$0.06 per fully paid ordinary share.
- The exercise price of 4,200,000 options shall be A\$0.08 per fully paid ordinary share.
- The exercise price of 4,200,000 options shall be A\$0.10 per fully paid ordinary share.
- The exercise price of 4,200,000 options shall be A\$0.12 per fully paid ordinary share

The options shall be exercisable at any time until 30 April 2019.

About Volt Resources Ltd (ASX: VRC)

Volt Resources Ltd (the "**Company**") is a graphite exploration company listed on the Australian Stock Exchange under the ASX code VRC. The Company is focused on the exploration and development of its' existing wholly owned Namangale Graphite Project in Tanzania and the identification of further assets globally which have the potential to add value to shareholders.
