

Xped Limited

Launch Date Set for Xped Device Browser App

Xped to officially launch global first Device Browser (DeB) App in September Quarter.

Device browser (DeB) App to be available in both Android and Apple iOS stores.

Release of Beta App version for Android to occur in coming weeks.

Xped Global First Device Browser (DeB) App to be Multilingual.

Xped Limited (ASX: XPE) ("Xped" or "the Company") is pleased to announce that it has engaged leading software developer Codium to develop and build the next release of the company Device Browser ("DeB") App. Under the agreement, Codium will provide full native Android and iOS Apps.

The release of the "DeB" App is due in both App stores during the September quarter, making it the first "Device Browser App" to ever be released in the world. Simply tap a BLE/NFC enabled smartphone to a device, give it a nickname and it's ready to control. The phone automatically discovers the device, sets up a secure wireless network, gathers any resources needed and learns how to display its user interface; all from one simple tap gesture. This technology is at the heart of the device browser.

Xped plans to release the current beta release of DeB for Android in late June and this first release will include a Chinese language offering. China is a core target market for usage of ADRC, and this language offering will assist in uptake of subscriptions of the App.

In addition to these current activities the company has begun producing a series of engineering support manuals regarding the ADRC technologies. This will ensure a full overview is available, along with RML user guide and language references.

The engineering manuals will assist developers and manufacturers to better utilise RML and provides all the reference material needed to adopt the technology.

By order of the Board

Xped Limited

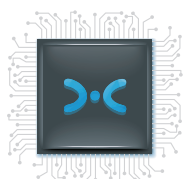

ABOUT XPED

Xped has developed revolutionary and patent protected technology that allows any consumer, regardless of their technical capability, to connect, monitor and control devices and appliances found in our everyday environment. It's as simple as two people shaking hands. By enabling the Internet of Things, Xped's ADRC platform will bring benefit to Manufacturers, Retailers, Service Providers and Consumers.

At Xped, we're *Making Technology Human Again.*
