ADRC Now Running on Intel® Moon Island Gateway

Xped Limited **(ASX: XPE) ("Xped" or "the Company")** is excited to announce it has completed the final step of testing ADRC services against Intel® Moon Island gateway platform on the Advantech hardware.

As announced on the 25th May, the Company had successfully completed its porting of its ADRC gateway services using an Advantech Embedded IoT Gateway running Linux.

This last phase fulfils the requirements of Xped in completing the IoT gateway solution to demonstrate ADRC capabilities on Moon Island and will now seek verification from Intel®.

Xped wishes to acknowledge the great support Intel® have provided with this project and the Company is excited with the opportunity of working with a world leading technology company who understands the changing IoT landscape and continues to push innovation.

The Company expects upon verification of the ADRC end-to-end solution running on Moon Island gateway platform, further engagement to begin with Intel® customers and OEMs looking to expand their gateway offering with ADRC integration.

By Order of the Board

Xped Limited

ABOUT XPED

Xped has developed revolutionary and patent protected technology that allows any consumer, regardless of their technical capability, to connect, monitor and control devices and appliances found in our everyday environment. It's as simple as two people shaking hands. By enabling the Internet of Things, Xped's ADRC platform will bring benefit to Manufacturers, Retailers, Service Providers and Consumers.

At Xped, we're *Making Technology Human Again.*
