

PYX Completes A\$11.2M Placement to Accelerate Tisma Development to Meet Customer Demand

PYX Resources Limited (PYX or the Company) (NSX: PYX) is pleased to announce that it has received firm commitments to raise A\$11.2 million (before administrative, legal and placement fees) via a share placement to professional and sophisticated investors at A\$1.03 per share with approximately 10.9 million new fully-paid ordinary shares to be issued ("**Placement**").

Proceeds from the Placement, in combination with existing cash reserves, will be used to accelerate the development of the Tisma tenement, the zircon rich deposit acquired in February 2021, as well as for general working capital purposes. The funding will be utilised for PYX to invest in its in-house mining at the Tisma deposit, together with the installation of a Mineral Separation Plant and the required investments in logistics to meet the demand of growing high-tech applications.

The zircon pricing environment is expected to remain strong in the medium and long term, as lack of supply continues to grow. As China's economy expands and European economies recover from the pandemic, supply issues are compounded. In a time of a global switch to green energy, premium zircon, such as PYX's, is in great demand for creating fused zirconia and other products, where standard zircon cannot be used. This is relevant for the world to tackle the climate crisis and to produce electric vehicles, solar cells and other green energy technologies.

PYX's Chairman and Chief Executive Officer, Oliver Hasler, said: *"The success of this transaction is an endorsement of PYX's business strategy as a consolidator of premium mineral sands deposits in Indonesia, supported by strong sales volume growth. Actual market conditions are perfect, in the midst of a strong mineral sands industry up-cycle, for our growth strategy commencing with extraction in our newly acquired Tisma deposit in the near future. Also, for the world to tackle the climate crisis there will be need for a sharp increase in metal supplies required to produce electric vehicles, solar cells and other green energy technologies, such as zircon"*

Placement Details

The Placement will comprise the issue of approximately 10.9 million new fully paid ordinary shares ("**New Shares**") at an issue price of A\$1.03 per share, which represents a 19.5% discount to the last trade of A\$1.28.

The New Shares will be issued in a single tranche, pursuant to the Company's existing 15% placement capacity and will not require shareholder approval.

Settlement of the Placement is expected to occur on Wednesday 23rd June 2021 and the New Shares will rank equally with the Company's existing shares on issue.

Phoenician Advisory Services Limited served as lead manager to the Placement.

21 June 2021

The Company notes that it continues to explore a dual listing of the Company's ordinary shares on the Standard Segment of the London Stock Exchange (LSE) (refer announcement dated 25 May 2021) within the next three months and, should this eventuate, may conduct a further placement of shares as a part of the listing process to create liquidity on LSE and accommodate European investors.

About PYX Resources

PYX Resources Limited (NSX: PYX) is a major global producer of premium zircon listed on the National Stock Exchange of Australia. PYX's key deposits, Mandiri and Tisma, are large-scale, near-surface open pit deposits both located in the alluvium-rich region of Central Kalimantan, Indonesia. PYX, whose Mandiri deposit has been in production since 2015, is the 2nd largest zircon producing mining company globally by zircon resources. Determined to mine responsibly and invest in the wider communities where we operate, PYX Resources is committed to fully develop its Mandiri and Tisma deposits, with the vision to consolidate the mineral sands resources in Kalimantan and explore and acquire mineral sands assets in Asia and beyond.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This NSX Announcement contains forward-looking statements and forward-looking information within the meaning of applicable Australian securities laws, which are based on expectations, estimates and projections as of the date of this NSX Announcement.

This forward-looking information includes, or may be based upon, without limitation, estimates, forecasts and statements as to management's expectations with respect to, among other things, the timing and amount of funding required to execute the Company's exploration, development and business plans, capital and exploration expenditures, the effect on the Company of any changes to existing legislation or policy, government regulation of mining operations, the length of time required to obtain permits, certifications and approvals, the success of exploration, development and mining activities, the geology of the Company's properties, environmental risks, the availability of labour, the focus of the Company in the future, demand and market outlook for precious metals and the prices thereof, progress in development of mineral properties, the Company's ability to raise funding privately or on a public market in the future, the Company's future growth, results of operations, performance, and business prospects and opportunities. Wherever possible, words such as "anticipate", "believe", "expect", "intend", "may" and similar expressions have been used to identify such forward-looking information.

Forward-looking information is based on the opinions and estimates of management at the date the information is given, and on information available to management at such time. Forward looking information involves significant risks, uncertainties, assumptions and other factors that could cause actual results, performance or achievements to differ materially from the results discussed or implied in the forward-looking information. These factors, including, but not limited to, fluctuations in currency markets, fluctuations in commodity prices, the ability of the Company to access sufficient capital on favourable terms or at all, changes in national and local government legislation, taxation, controls, regulations, political or economic developments in Indonesia and Australia or other countries in which the Company does business or may carry on business in the future, operational or technical difficulties in connection with exploration or development activities, employee relations, the speculative nature of mineral exploration and development, obtaining necessary licenses and permits, diminishing quantities and grades of mineral reserves, contests over title to properties, especially title to undeveloped properties, the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other geological data, environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding, limitations of insurance coverage and the possibility of project cost overruns or unanticipated costs and expenses, and should be considered carefully. Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company. Prospective investors should not place undue reliance on any forward-looking information.

21 June 2021

Although the forward-looking information contained in this NSX Announcement is based upon what management believes, or believed at the time, to be reasonable assumptions, the Company cannot assure prospective purchasers that actual results will be consistent with such forward-looking information, as there may be other factors that cause results not to be as anticipated, estimated or intended, and neither the Company nor any other person assumes responsibility for the accuracy and completeness of any such forward-looking information. The Company does not undertake, and assumes no obligation, to update or revise any such forward-looking statements or forward-looking information contained herein to reflect new events or circumstances, except as may be required by law.

No stock exchange, regulation services provider, securities commission or other regulatory authority has approved or disapproved the information contained in this NSX Announcement.

Compliance Statement

The Mandiri mineral sands deposit hosts a 6 Mt Inferred JORC Resource of zircon. The Company originally announced this resource in its Prospectus released on 20 February 2020 and confirms that it is not aware of any new information or data that materially affects the information included in the Prospectus. All material assumptions and technical parameters disclosed in the Prospectus that underpin the estimates continue to apply and have not materially changed.

The Tisma mineral sands deposit hosts a 4.5 Mt Inferred JORC Resource of zircon. The Company originally announced this resource in its Announcement “PYX Resources Limited Agrees to Acquire Tisma Development (HK) Limited, a World-Class, Fully Licensed Mineral Sands Deposit” on NSX on 13 January 2021 and confirms that it is not aware of any new information or data that materially affects the information included in the Announcement. All material assumptions and technical parameters disclosed in the Announcement that underpin the estimates continue to apply and have not materially changed.

Together the Mandiri mineral sands deposit and Tisma mineral sands deposit total 10.5Mt of contained zircon resource.
