Explor has only been drilling the “south limb” of the TPW syncline

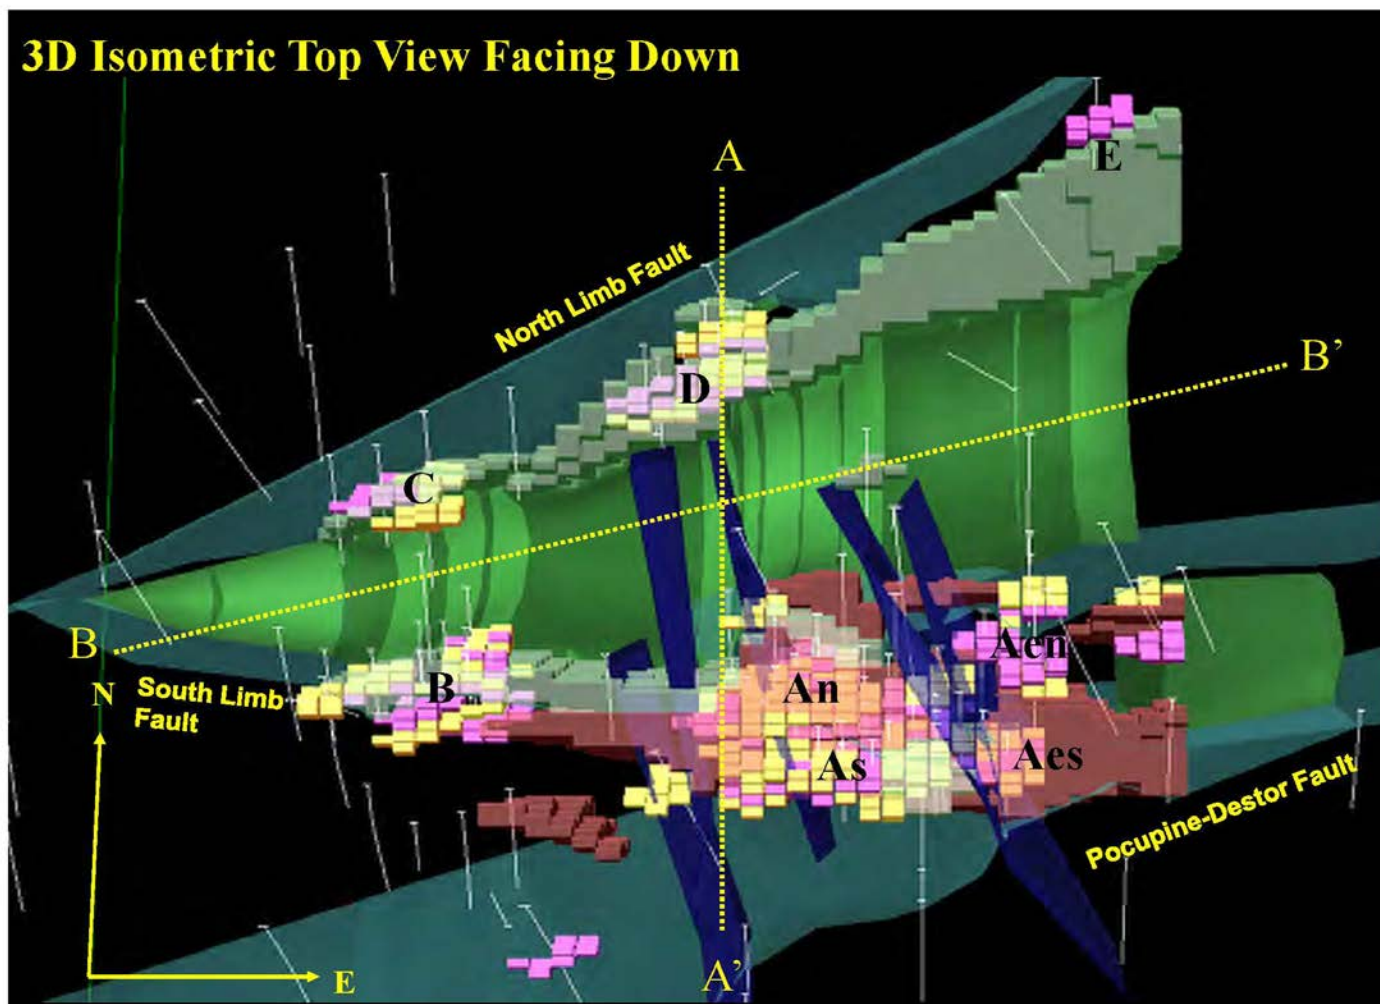

-
- The map displays a geological cross-section of the Taconic Mountains. The central feature is a large, elongated, red-shaded area representing a fold. This fold is divided into two main parts: the 'NORTH LIMB' (upper) and the 'SOUTH LIMB' (lower). The fold is bounded by a dashed line labeled 'LINE #2' and a solid line labeled 'LINE #1'. The area between these lines is labeled 'Area of high Grade Interaction'. The map shows various geological units, including 'Taconic Schist' (red), 'Taconic Gneiss' (orange), 'Taconic Amphibolite' (green), 'Taconic Metagabbro' (blue), 'Taconic Metakalke' (yellow), 'Taconic Metasiltstone' (light green), 'Taconic Metasandstone' (light blue), 'Taconic Metasiltstone' (light green), 'Taconic Metasandstone' (light blue), 'Taconic Metasiltstone' (light green), and 'Taconic Metasandstone' (light blue). The map also shows several faults, including 'Fault #1' and 'Fault #2'. A legend in the bottom right corner defines the symbols used for various geological features. A scale bar at the bottom indicates distances from 0 to 1000 feet. A north arrow is located in the top left corner.
