## Highlights

- **Successful \$7 million placement to institutional and sophisticated investors.**
- **Funds raised from the Placement will be applied towards advancing the Company's Niagara Bauxite Project and Simandou North Iron Project including:**
  - **Finalisation of the maiden JORC resource estimate at Niagara;**
  - **Completing a Scoping Study on the Niagara Bauxite Project; and**
  - **Undertaking further drilling, metallurgical test work, and permitting processes at the Company's Niagara Bauxite and Simandou North Iron Projects.**

Arrow Minerals Limited (ASX: **AMD**) (**Arrow** or the **Company**) is pleased to announce it has received firm commitments from institutional and sophisticated investors to raise gross proceeds of approximately \$7 million (the **Placement**).

Arrow Managing Director David Flanagan said: *"We are delighted with the strong support received for this capital raising which demonstrates the market's growing awareness of the significant potential of Arrow's bauxite and iron ore projects. This capital raising positions Arrow with a robust balance sheet, enabling the Company to finalise its maiden mineral resource estimate, complete a scoping study and undertake further drilling at the Company's Niagara Bauxite project. The quality and scale of the mineralisation demonstrated by recent drilling has illustrated the world class nature of the Niagara Bauxite Project. We will also continue to progress commercial studies, metallurgical test work, and progress the environmental permitting process at both the Niagara Bauxite and Simandou North Iron Projects. We were very well bid for the Placement and received strong support from new investors and the Company's existing shareholders.*

*We believe that these work streams will demonstrate the significant value of both of our projects in Guinea, which we anticipate will rapidly drive demonstrable shareholder value."*

## About Arrow Minerals

Arrow is focused on creating value for shareholders through the discovery and development of mineral deposits into producing mines. The Company's development strategy is to streamline a pathway to execution of a 'starter mine' that can later be expanded once in production<sup>1</sup>.

Arrow currently has two projects in Guinea, West Africa. The Simandou North Iron Project (**Simandou North**) and the Niagara Bauxite Project<sup>2</sup> (**Niagara, Niagara Project**). Both Niagara and Simandou North are located within trucking distance to the Trans-Guinean Railway (TGR) that is currently under construction by Winning Consortium Simandou. The location of the Niagara Project relative to the TGR provides significant benefits to the development of the project as a result of multi-user access to rail and port infrastructure (Figure 1).
