ASX code: PIQ

Proteomics International receives \$1.85 million in R&D tax incentive

Proteomics International Laboratories Ltd (Proteomics International; ASX: PIQ), a pioneer in predictive diagnostics, is pleased to announce that its cash reserves have been further strengthened by the receipt of \$1.85 million in research and development tax incentive for the 2022-23 financial year.

Proteomics International's business model sees the Company pursue ground-breaking R&D with blue-sky potential in next generation diagnostic tests using its Promarker™ technology platform, and underpinned by revenue generated from providing sophisticated analytical services.

As commercialisation progresses for PromarkerD, the Company's simple cost-effective predictive test for diabetic kidney disease, Proteomics International is advancing two other blood tests - PromarkerEndo for endometriosis, and PromarkerEso for oesophageal cancer - both part of a rich pipeline of diagnostics tests in development.

In 2022-23, Proteomics International spent \$4.25 million on R&D, enabling the company to receive an Australian Government rebate of \$1,848,832.

The Federal R&D tax incentive encourages companies engaging in beneficial research to Australia by providing a cash rebate of 43.5% for qualifying activities.

Authorised by Dr Richard Lipscombe (Managing Director) and Mr Neville Gardiner (Non-Executive Chairman) on behalf of the Board of PIQ.
