

Inspections Completed following Earthquake, no Damage, Operations Re-commence.

Key Highlights

- Inspections of the surface and underground infrastructure at the Woods Point Gold Project – Morningstar Mine - have been completed following a magnitude 5.9 earthquake which occurred on 22 September 2021.
- No injuries or damage resulted from the earthquake.
- Above ground and underground operations have re-commenced.

This announcement is an update to our announcement on 22 September 2021.

A magnitude 5.9 earthquake, centred south of Mansfield in central Victoria, occurred at around 9:15am on 22 September 2021. White Rock's Woods Point Gold Project is located approximately 15kms from the epicentre.

Nine personnel were underground at the time of the earthquake. All personnel safely exited the mine.

Inspections of the mine site, above ground and underground, have now been completed. No damage was evident resulting from the earthquake.

Mine operations, above ground and underground, have now re-commenced.

This announcement has been authorised for release by the board.
